

## State of Idaho

# Structures and Landmarks Data Exchange Standard

Part of the Public Safety Theme

Version 1.0

Effective May 1, 2011

Developed by the Idaho Public Safety Technical Working Group

### Revision History

07/01/13 – Changed “ITRMC” to ITA”

Established by ITRMC April 27, 2011

### Contact

Bill Reynolds, Public Safety Coordinator

## 1. INTRODUCTION

This document describes the specifications for the dataset referred to as “Structures Framework.” This standard is intended to facilitate integration and sharing of structures data across Idaho and to enhance dissemination and use of accurate, seamless, and up-to-date structure information. This standard is vital since many government and private entities have business needs for Structures Framework. Uses of Structures Framework include 911 support, disaster planning, building inspections/appraisals, economic analysis, and facilities management.

The Structures Framework includes all structures and addresses, as well as landmarks; this includes *all* the parts of the Venn diagram shown in Figure 1.

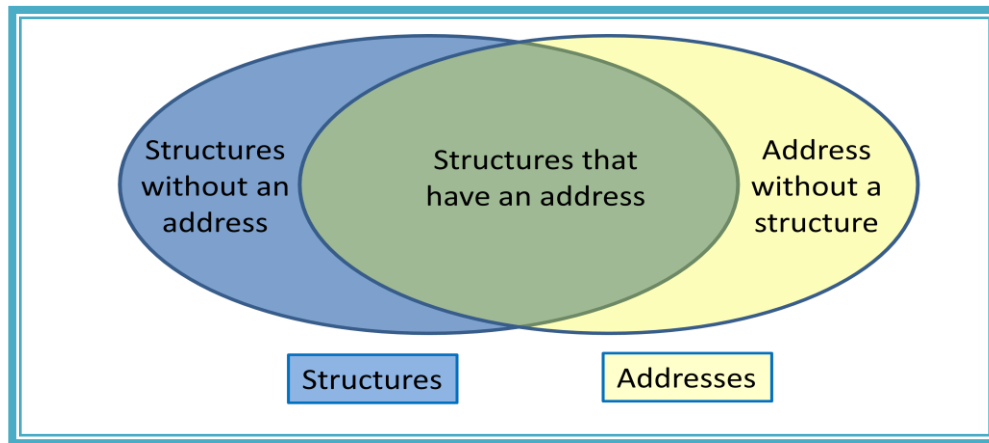

Figure 1: Venn diagram showing the intersection between Addresses and Structures. The scope of this standard indicated by the outline.

Examples of features included under this Standard are:

Structures with address: Residence on a street, business in a business park, courthouse

Address without a structure: unimproved lot, pasture, brownfield

Structures usually without an address: outbuildings (sheds, garages), seasonal roadside stands

Landmarks: Cave opening, scenic overlook, folk sculpture, signage.

The development of this standard was supported by Cooperative Agreement Number G09AC00411 from the United States Geological Survey.

### 1.1. Mission and Goals

The Idaho Structures and Landmarks Data Exchange Standard (ISLDES) supports a statewide dataset that is consistent with applicable state and national standards, regularly updated, seamless, appropriately accessible, and mutually beneficial to both data producers and data consumers (referred to as Structures Framework). Structures Framework is designed to be broad enough to support a wide range of functions within government and the private sector but is sufficiently focused to facilitate emergency response and planning, and thereby enhance public safety.

## 1.2. Description and Context of the Structures Element

Structures data is an element of the Public Safety Theme which also includes Emergency Service Zones and Critical Features (see <http://gis.idaho.gov/portal/framework/Misc.htm> for more information).

## 1.3. Relationship to Existing Standards

This standard relates to existing standards as follows:

- Federal Geographic Data Committee (FGDC), the *United States Thoroughfare, Landmark, and Postal Address Standard* (Draft, March 2010). This standard is an all-encompassing standard for all types of addresses including international. This standard will be used as a touchstone to evaluate the efficiency and effectiveness of the ISLDES. Review of Thoroughfare and Landmarks will be included in the next version of this standard.
- Oregon Geographic Information Council (OGIC), *Geospatial Data Addressing Standard (v 1.0 Nov 5, 2004)*. This standard formed the starting point for the standards set out in this document and will ensure that standards are consistent across Oregon-Idaho state boundary.
- National Emergency Number Association (NENA) standards, including the *NENA Standard Data Formats for ALI Data Exchange & GIS Mapping (v 8.2, June 10, 2009)*. These publications explain the standards used by 911 service providers in providing address information to public safety answering points (PSAP's)
- United States Postal Service *Postal Addressing Standards Publication 28* (Nov 2000). The USPS publication 28 is the mailing standard that most communities in Idaho have followed or have based their addressing updates, changes and projects on. This standard also has a list of abbreviations and when how and where to use them.
- American Planning Association (APA) *Land Based Classification Standards* for structure type and function type codes. This standard provides the APA Codes that are used in the ISLDES.
- National Structures Database (NSD). This standard provides the Feature Codes (FCODES) used for the ISLDES.

## 1.4. Description of Standard

This standard provides the foundation for the development, maintenance, and dissemination of structures data throughout the state of Idaho. This standard is devised to be:

- Simple, easy to understand, and logical
- Uniformly applicable, whenever possible
- Flexible and capable of accommodating future expansions
- Dynamic in terms of continuous review.

### **1.5. Applicability and Intended Use**

This standard applies to the Structures element of the Public Safety theme of Idaho Framework. When followed, it will increase interoperability among automated geographic information systems, enable sharing and efficient transfer of data between producers and users, and build information partnerships among government institutions and the public and private sectors. This standard is intended to enable integration of structures data statewide, with special emphasis on supporting Next Generation 911 (NG911) and related public safety purposes.

### **1.6. Standard Development Procedures**

Kootenai County, Teton County, the Coeur d'Alene Tribe and INSIDE Idaho drafted a basic data model and began collecting structure data prior to the formalization of the Public Safety Technical Working Group. The Structures workgroup has been meeting and discussing standards since March 2009. Efforts were made to identify existing Structure standards at the national level and a sampling of nearby states that would meet established objectives. Such standards were found to be either non-existent or rudimentary and not parallel to the scope of Structures Framework. However, many sources were used to develop aspects of this standard, including four different organizations' methods of structure coding, namely: The United States Forest Service's *Cartographic Feature File* (CFF); The International Building Codes structure type coding system; *The Standard Land-Use Coding Manual* (SLUCM); and the American Planning Association *Land Based Classification Standards* (LBCS).

A straw man standard was drafted and submitted to the Public Safety TWG for review in June 2009. A second review was submitted to the Structures Workgroup in October 2009. Feedback was incorporated. The draft standard was then presented at the Forum in June 2010. There were no objections to advancing it to the Idaho Geospatial Council Executive Committee (IGC-EC). On June 17, IGC-EC approved the draft for consideration by ITRMC. Since then, the standard was presented to the Idaho Emergency Communications Commission. Following a comment period, significant input was provided which triggered further revisions to this standard. After a second comment period and further revisions, the standard is ready to be established. It was approved by IGC-EC and established by ITRMC in February and April 2011, respectively.

### **1.7. Maintenance**

This standard will be revised as needed and in accordance with Policy P5030.

## **2. BODY OF THE STANDARD**

### **2.1. Scope and Content**

The purpose of this standard is to establish the minimum requirements for the collection and integration of structures and landmark data and to facilitate the maintenance and use of that information. The content of this standard is focused on the essential data, data quality, and metadata elements required for structures data to be maintained and used locally as well as integrated for regional and statewide use. Supporting public safety uses is the principal focus when exploring new ideas and making determinations on future development.

## **2.2. Need**

Structures and Landmarks are part of the foundation needed to support emergency services. In particular, these features support current and future 911 implementation, known as enhanced 911 (e911) and NG911. As Idaho works to collect key datasets, this standard will provide the minimum specification by which the locally managed data can be integrated into regional and statewide datasets. In addition to supporting emergency services, this standard supports other uses in economic development, planning, and routine business processes.

## **2.3. Participation in Standard Development**

The development of the ISLDES adheres to the Framework Standards Development Policy (P5030). A USGS CAP Award has expedited efforts in Idaho to plan stewardship of Structures and develop this standard. Although key participants are few, they represent diverse stakeholder groups. Outreach efforts provide opportunity for broad input in the development of this standard. For example, drafts have been made available for review and comment by stakeholders identified in a series of regional meetings. In addition, it is posted on <http://gis.idaho.gov/portal/>. The process will be equally broad for updates and enhancements to the standard. As with all Idaho Framework standards, public review of and comments on the ISLDES is actively sought.

## **2.4. Integration with Other Standards**

This standard follows the same format as other Idaho Framework data standards. The specifics of this standard must integrate with the addressing, cadastral, road centerline standards. This standard includes type codes established by the American Planning Association and feature codes defined by the USGS in the National Structures Dataset.

## **2.5. Technical and Operation Context**

### **2.5.1. Data Environment**

The data environment for Structures is a vector model, comprised of points with associated attribute information. The exchange format for structures data is the shapefile, which is an open published format (see <http://www.esri.com/library/whitepapers/pdfs/shapefile.pdf>). In designating the shapefile as the exchange format, this standard accommodates limitations imposed by the shapefile model, such as keeping attribute (field) names to ten characters or less. Alternatively, tabular data with latitude and longitude is acceptable in .dbf, .csv, or Access database (ver. 2007 and higher) formats.

### **2.5.2. Reference Systems**

Framework datasets are distributed in Idaho Transverse Mercator (IDTM83), Idaho's single-zone coordinate system. Data contributions may be in any coordinate system; however, converting existing data to the most current realization of horizontal and vertical datums is encouraged where such conversion is feasible. As of this writing, the most current realization for horizontal coordinates is the North American Datum of 1983 (NSRS 2007); for vertical coordinates it is the North American Vertical Datum of 1988. No matter what reference system is used, it must be

clearly documented in the metadata accompanying the dataset and a projection must be explicitly defined and included.

### **2.5.3. Global Positioning Systems**

Structure Data can be collected using GPS, as long as the accuracy of the data falls within accuracy specified in 2.5.7.

### **2.5.4. Interdependence of Themes**

The primary interdependent Framework themes are Cadastral (parcels), Transportation (road centerlines) and the Geographic Names Information Systems (GNIS) in the Reference category. Several sources may be used for determining or quality checking locations and attributes, including Cadastral (parcels and land-owner information), road centerlines and address ranges, aerial imagery, zip code boundaries, and telephone records.

### **2.5.5. Encoding**

All GIS software used in Idaho has the capability of encoding its format to the shapefile format.

### **2.5.6. Resolution**

Not applicable.

### **2.5.7. Accuracy**

Accuracy will vary across Structures Framework, primarily due to the variety of sources. For this reason documentation of accuracy is crucial and must be documented in the metadata. The target positional accuracy is 40 feet. As the effort matures and better data becomes available, a tighter accuracy will be specified.

### **2.5.8. Edge Matching**

Not applicable.

### **2.5.9. Unique Identifier**

A unique identifier enhances stability and maximizes use for those organizations that opt to maintain a local ID. This permits Structures Framework to be connected to current and future databases without further conditioning. To support this potential, a unique identifier will be maintained across the compiled database, consisting of the concatenation of GISSTEW and LOCALID.

### **2.5.10. Attributes**

The attributes included in this standard describe each structure or are required to manage the data. See Section 3 for minimal and optional characteristics for Structure attributes.

### **2.5.11. Stewardship**

Perpetual maintenance and other aspects of lifecycle management are essential to Structures Framework. Details of stewardship partners, their roles and responsibilities, and stewardship design and processes will be set forth in a charter, a plan, and related documents.

### 2.5.12. Records Management and Archiving

Records management and archiving will be provided for with specificity in the stewardship documents established for Structures Framework.

### 2.5.13. Metadata

Metadata will conform to the geospatial metadata standard(s) established by the State of Idaho (S4420 Metadata Standard).

## 3. DATA CONTENT AND FORMAT

### 3.1. Minimum Graphic Data Elements

The graphic data for structures is modeled as a point feature class containing only an X and Y value.

### 3.2. Optional Graphic Elements

Not applicable.

### 3.3. Minimum Attribute or Non-Graphic Elements

The attributes required for source contributions are:

FIELD NAME	DATA TYPE	LENGTH	REQUIRED	SHORT DESCRIPTION	EXAMPLE
GISSTEW	TEXT/STRING	20	yes	The steward of the data	IDAHOGIS
APACODE	INTEGER	5	Yes	This code comes from the modified APA code – Idaho Structures Type Codes – Appendix C	1000; 2000; 3000; 4000; 4110; 4510; 4520; 4530; 4600; 5000; 6000; 6900; 7000; 8000 Required: 4110 (hospital); 4200 (School); 4510 (Fire Station); 4520 (Police Station); 4530 (Emergency Operation Center); 4600 (Jail, penitentiary, correctional facility)

This standard adapts the American Planning Association’s Land Based Classification Standards (LBCS) structure type codes (Appendix C). The structure type code is used to populate APACODE. This helps to fulfill mapping requirements at state and local agencies. A code is required when the point feature represents one of these structure types: Hospital, School, Fire Station, Police Station, Emergency Operations Center, or Jail, Penitentiary or Correctional Facility. It is optional but strongly encouraged on all other types. During aggregation, the corresponding USGS National Structures Dataset code will be assigned.

Use of abbreviations in the FGDC standard is discouraged to avoid misinterpretation. However, the ISLDES does allow specific abbreviations. When and where abbreviations are permitted is explained in section 3.5. Abbreviations are acceptable until such time as this standard adopts the FGDC business rule.

The following attributes are automatically calculated during horizontal integration:

FIELD NAME	DATA TYPE	LENGTH	REQUIRED	SHORT DESCRIPTION	EXAMPLE
FULLADDRESS	TEXT/STRING	75	no	Calculated during aggregation	89 N Main St; 455 N 5000 W;
CARTOTYPE	TEXT/STRING	15	no	Calculated during aggregation	Residential; Commercial; Public Assembly; Institutional or community facility; Transportation; Utility; Military; Agricultural
STRUCTTYPE	TEXT/STRING	15	no	Calculated during aggregation	Hospital; School; Fire Station; Police Station; Emergency Operation Center; Jail, detention, correctional facility; etc.
LAT	TEXT/STRING	11	no	Calculated during aggregation	47.123456
LONG	TEXT/STRING	11	no	Calculated during aggregation	-116.123456
FEATCODE	INTEGER	5	yes	NSD code generated from Idaho-APA codes using a cross-walk table.	USGS NSD codes
DATESUBMTD	INTEGER	8	yes	Calculated during aggregation	10302010

### 3.4. Optional Attribute and non-Graphic Elements

A complete list of attributes is shown below. The attributes in shaded boxes are optional.

FIELD NAME	DATA TYPE	LENGTH	REQUIRED	SHORT DESCRIPTION	EXAMPLE
GISSTEW	TEXT/STRING	20	yes	The steward of the data	IDAHOGIS
APACODE	INTEGER	5	yes	<sup>a)</sup> This field requires the following values when applicable: 4110 (hospital); 4200 (School); 4510 (Fire Station); 4520 (Police Station); 4530 (Emergency Operation Center); 4600 (Jail, penitentiary, correctional facility); 9999 (To be determined)	1000; 2000; 3000; 4000; 4110; 4510; 4520; 4530; 4600; 5000; 6000; 6900; 7000; 8000
FEATCODE	INTEGER	5	yes	A complete list of FEATCODES can be found on the Framework Web pages. Note that there are no FEATCODES for residential structures. FEATCODEs are specified in the National Structures Database.	
ADDPFX	TEXT/STRING	3	NO	Address Prefix – rare	N,S,E,W,NE,NW,SE,SW, ½, ¼ A, B, C, . . .
ADDNUM	LONG INTEGER		no	Address number	1; 26; 125; 1501; 10545
ADDSFX	TEXT/STRING	3	no	Address Suffix	N,S,E,W,NE,NW,SE,SW, ½, ¼ A, B, C, . . .

STPREMOD	TEXT/STRING	6	No	Street pre-modifier	Old, New
STPREDIR	TEXT/STRING	2	no	Street Pre direction	<sup>b)</sup> N,S,E,W, NE, NW, SE, SW
STPREFIX	TEXT/STRING			Street PreType	<sup>b)</sup> ST, RD, CIR, DR
STNAME	TEXT/STRING	40	no	Street name	MAIN
STSUFFIX	TEXT/STRING	4	no	Street name suffix type	<sup>b)</sup> ST, RD, CIR, DR
STPOSTDIR	TEXT/STRING	2	NO	Street post directional	<sup>b)</sup> N,S,E,W, NE, NW, SE, SW
STPOSTMOD	TEXT/STRING	6	NO	Street post modifier	Old, New, A, B, C, etc
PRUNITTYPE	TEXT/STRING	10	No	Pre Unit Type Building/Floor <sup>c)</sup>	b) BLDG,FLR, UNIT
PRUNITID	TEXT/STRING	10	No	Pre Unit Identifier BLDG or FLOOR number or letter. This can represent an individual or range of addresses	1, 2, A, B, 101, 201, 1 – 12, etc.
SBUNITTYPE	TEXT/STRING	10	no	Sub Unit Type	**APT; STE; BLDG
SBUNITID	TEXT/STRING	10	no	Sub Unit. This could be used to represent fractional addresses if an entity doesn't have a cleaned postal addressing scheme. This can also be used to denote ranges of addresses in the case of multiple apartments (e.g. APT 1-35).	# 10; 10, ½, A, B, C, 1 – 10, A – H, 100 – 220, etc
FLOORS	TEXT/STRING	10	NO	Number of Floors in building	
COMMNAME	TEXT/STRING	20	no	Community, City, Postal Community	Rexburg; Boise; Moscow
STATE	TEXT/STRING	2	no	State	ID
ZIP	INTEGER/TEXT		NO	Zip Code (5 digit code)	83440
ZIP4	INTEGER/TEXT		no	Zip Code (+ 4 if needed)	1526
LANDMARK	TEXT/STRING	50	NO	Name of landmark/location	Dworshak Dam, Memorial Bridge
LAANM	TEXT/STRING	25	No	Local Addressing Authority Name	City of Meridian, NPC, Ada County, CDA Tribe, etc
PRIMSTRUCT	TEXT/STRING	5	No	<sup>d)</sup>	Prim/Sec OR 1/0 OR Yes/No
PRIMADD	TEXT/STRING	5	No	<sup>e)</sup>	Prim/Sec OR 1/0 OR Yes/No

LOCALID	TEXT/STRING	12	no	Local ID if used by contributor	1; ADA-1
PHOTO	RASTER		no	Photo(s) of the structure for local use.	server/structurepics/1234.jpg
COMMENTS	TEXT/STRING	250	no	Comments relevant to the structure	Jo's Auto Body; Pizza Hut
GNISID	TEXT/STRING		no	Obtained from USGS	22540
CRTEDATE	INTEGER	8	NO	Date structure point created: GPS'ed, hand digitized, etc	20101212
CHNGDATE	INTEGER	8	NO	Date of last change to structure status; address, APACode, etc.	20101212
DATEBUILT	INTEGER	8	NO	Date structure was built	20101212
FULLADDRSS	TEXT/STRING	75	no	Calculated during aggregation	89 N Main St; 455 N 5000 W;
CARTOTYPE	TEXT/STRING	15	no	Calculated during aggregation	Residential; Commercial; Public Assembly; Institutional or community facility; Transportation; Utility; Military; Agricultural
STRUCTTYPE	TEXT/STRING	15	no	Calculated during aggregation	Hospital; School; Fire Station; Police Station; Emergency Operation Center; Jail, detention, correctional facility; etc.
LAT	TEXT/STRING	11	no	Calculated during aggregation	47.123456
LONG	TEXT/STRING	11	no	Calculated during aggregation	-116.123456

<sup>a)</sup> APA: <http://myapa.planning.org/LBCS/GeneralInfo/>

<sup>b)</sup> USPS Publication 28

<sup>c)</sup> PRUNITYPE: This field is used to handle addressing structures which incorporate several buildings or floors that also have SUBUNITS (i.e. BLDG 1 UNIT 4, FLR 7, STE 16) otherwise just use the SUBUNIT (TYPE/ID) fields if there are no sub units to the building or floors. The preferred method would be to incorporate the building/floor with the address. Such as: Unit 716 could mean 7th floor 16th unit. Unit A12 – Building A Room 12. We included this field to give entities the flexibility to represent the address either way.

<sup>d)</sup> PRIMSTRUCT: If multiple buildings share a common address, but are not the primary address, this field is used to denote this relationship. For instance: The home on a piece of property has a detached garage and a shed. Each structure shares the same address as the home, but it is not the primary structure for that address. Each structure would have its own unique structure ID but share a common Address ID.

<sup>e)</sup> PRIMADD: If multiple structure points are placed on top or adjacent to each other to represent multiple address for a single structure this field is used to distinguish the primary address point. For instance if an apartment building has 35 units, 35 structure points would be placed on each other or in the relative location of their entrances. One would be designated as the primary address and the primary structure (the manager's apt or apt offices).

Consistent codes assure the resulting data set can be reliably queried and mapped. There are two accepted classification systems:

- 1) The American Planning Association's (APA) Land-Based Classification Standard (LBCS) for structures. A complete list of APA codes is available on the APA Web site. The modified version used by this standard is attached as Appendix C.
- 2) The USGS has assigned feature codes for use in their National Structures Dataset. A complete list of structures-related feature codes is available at <http://gis.idaho.gov/portal/framework/Misc.htm>.

The structures committee developed a modified APA code system. This system combines the two and adds additional codes as needed by the GIS community. For more detail, see Section 4.2.

### **3.5. Attribute Domains and Examples**

- 1) ADDPFX: Can be used for fractional addresses, leading zeros, letters or other numbers when not related to a multiple unit structure.
- 2) ADDSFX: Can be used for fractional addresses, letters or other numbers when not related to a multiple unit structure.
- 3) STPREMOD: Street Name Modifier - Old, New, etc.
- 4) STPREDIR: Pre-directional based off of Geographical Directional abbreviation from USPS Publication 28 standards Appendix B page 53 (April 2010).
- 5) STPRFX: Street Prefix: example Ave A, domain is the Street Abbreviations from USPS Publication 28 standards Appendix C, page 57 (April 2010).
- 6) STSFX: Street Suffix: example Grant Blvd, domain is the Street Abbreviations from USPS Publication 28 standards Appendix C, page 57 (April 2010).
- 7) STPOSTDIR: Post Directional, based off of Geographical Directional abbreviation from USPS Publication 28 standards Appendix B page 53 (April 2010).
- 8) PRUNITTYPE: The Sub address type represents the address when there are separate buildings or floors with sub units in the building or floor. For instance: 1230 Main St **FI 6** Ste 10 or 510 Grant St Bldg A, Rm 6. If the structure does not have a breakdown of this type, use only the Sub Unit Type and Sub Unit ID to designate multiple units. The domain is the Secondary Unit Designators from USPS Publication 28 standards Appendix C2 page 70 (April 2010).
- 9) PRUNITID: The Sub Address identifier is used to attribute the multiple floors or buildings of a single address location. In the case of multiple buildings or floors, designate the range in its entirety. Example FI= 6 or FI 1 – 8.
- 10) SUBUNITTYPE: Sub Unit type represents addresses for a multiunit structure or used where a single address is used for a multiple lot/space location, such as a trailer park. The domain is the Secondary Unit Designators from USPS Publication 28 standards Appendix C2 page 70 (April 2010).
- 11) SUBUNITID: The sub unit identifier this identifies the units in a multi unit structure or multiple lot address location. In the case of the Multi-unit building the field can be used to designate the range of applicable addresses. Example: Ste 101 or Ste 101–212.
- 12) STATE: Abbreviated as designated in the USPS Publication 28 standards Appendix B page 53 (April 2010).

- 13) LOCALID: This is a unique, persistent and consistent id assigned by the source stewards. Otherwise it will be calculated at the time of aggregation.
- 14) FEATCODE: This field has been added for entities that create their data and use the NSD for their structure type domain. A crosswalk table (available at <http://gis.idaho.gov/portal/framework/Misc.htm>) defines the relationship with the APA structure type codes.

#### **4. DATA COMPILATION PRACTICES AND MAPPING RULES**

##### **4.1. Placement of Structure Point**

The preferred placement of a point is at the entrance of a structure, point of access to the location. However, different placement conventions are acceptable and must be described in the metadata.

##### **4.2. Land Classification Codes for Single Structure**

Structure classification based on structure type and function indicates the use or usage of a structure at a location. Primary Activity codes, listed below, are the most general coding for structure type.

- 1000 Residential Buildings
- 2000 Commercial Buildings
- 3000 Public Assembly Structures
- 4000 Institutional or Community Facilities
- 5000 Transportation Facilities
- 6000 Utility and other Non-building Structures
- 7000 Military Structures
- 8000 Sheds, Farm Buildings, Agricultural Facilities
- 9000 No Structure

The use of a more specific code is encouraged, such as 1121 for a duplex rather than 1000. If more than one code is indicated for a structure, additional fields may be added, such as APACODE2, APACODE3, etc. Structures Framework will reflect the primary structure code in the first position.

This standard uses a modified LBCS to handle structure/functions not incorporated into the APA standard. New codes are generated by the APA code review committee (sub-committee of the Structures TWG). These new codes are passed to APA for review and incorporation into the LBCS. Codes can incorporate multiple uses for one structure. For example, APA code 2300 indicates an office or store building with a residence above.

The codes for the structure types required to be attributed are as follows:

- 4110 Hospital
- 4200 School
- 4510 Fire Station
- 4520 Police Station
- 4530 Emergency Operation Center
- 4600 Jail, Penitentiary Correctional Facility

Any features left blank will be populated with the null value 9999 to indicate "Unknown."

### **4.3. Multiple Address Points for a Single Structure**

Multiple points on a single structure are permitted as long as each of those points has a different address. For instance 101 N Front St (Primary Address), 101 N Front St Apt 1 (Secondary Address) 101 N Front St Apt 2 (Secondary Address) and so on. Use the PRIMADD attribute to indicate which one of those multiple point records should be considered the primary address point (PRIMADD = PRIM, yes or 1); other structure points are secondary addresses (PRIMADD = SEC, no or 0).

If a structure has multiple addresses, the addresses can be represented in a related table, while the structure dataset represent a range of addresses in that structure. Likewise if a structure has more than one distinct (unique) address, the same approach can be used, however Structures Framework would only show the 'primary' structure point and address.

The PRUNITYPE and PRUNITID can be used to handle addresses which incorporate multiple floors and units (as frequently found in apartment complexes). See paragraph 3.4 listing the Optional Attribute and non-Graphic Elements for details about each of the attributes. APA codes will be created as needed and documented in Appendix C.

### **4.4. Multiple Structures Associated with a Single Address**

Each structure should be a separate point feature, each with an identical address. For instance, a residential property may have multiple structures on a parcel, such as the home, detached garage and a shed. Likewise, a business may have several structures associated with it, the office and perhaps out buildings for storage or workshops. Use the PRIMSTRUCT attribute to indicate the primary structure point associated with the address (PRIMSTRUCT = PRIM, yes or 1); all other points are secondary structures (PRIMSTRUCT = SEC, no or 0).

### **4.5. Data Quality**

Data quality considerations for structures:

- Structures should have addresses where applicable.
- Structures should be up-to-date and reviewed regularly.
- All applicable attribute values should be populated.

## **APPENDIX B: Glossary**

### **Address**

An address specifies a location by reference to a thoroughfare or a landmark; or it specifies a point of postal delivery. U.S. Thoroughfare, Landmark, and Postal Address Data Standard (Feb. 2010).

### **Address Point**

An address point may be used synonymously with *structure* but is broader as it may encompass both an addressable structure and structures that usually are not assigned thoroughfare addresses.

### **Encoding**

The recording or reformatting of data into a digital format. Data may be encoded to reduce storage, increase security, or to transfer it between systems using different file formats. In GIS, analog graphic data, such as paper maps and images are encoded into computer formats by scanning or digitizing. (ESRI)

### **Landmark**

A prominent or conspicuous object on land that serves as a guide, especially to ships at sea or to travelers on a road; a distinguishing landscape feature marking a site or location. *Dictionary.com*.

### **Structure**

A structure is defined as “*that which is built or constructed.*” International Building Code (IBC), 2006.

## APPENDIX C: IDAHO STRUCTURES TYPE CODES

Modified from APA's Land-Based Classification Standard

ID	STRUCTURE_TYPE
1000	Residential buildings
1100	Single-family buildings
1110	Detached units
1120	Attached units
1121	Duplex structures
1122	Zero lot line, row houses, etc.
1130	Accessory units
1131	Domestic Shelter / Gazebo, picnic shelter
1132	Domestic Shelter / Playhouse, Playground, Treehouse
1133	Domestic Shelter / detached carport
1134	Domestic Shelter / detached garage / pole building residential in nature
1140	Townhouses
1150	Manufactured housing
1151	Manufacture Housed (declared real property)
1152	Manufactured house (not declared real property)
1160	Recreational Vehicle / Travel Trailer
1161	Recreational Vehicle
1162	Travel Trailer
1200	Multifamily structures
1202	Two units
1203	Three units
1204	Four units
1205	Five units
1206	Six units
1207	Seven units
1208	Eight units
1209	Nine units
1210	Ten units
1211	Eleven units
1212	Twelve units
1213	Thirteen units
1214	Fourteen units
1215	Fifteen units
1216	Sixteen units
1217	Seventeen units
1218	Eighteen units
1219	Nineteen units
1220	Twenty units

- 1221 Twenty-one units
- 1222 Twenty-two units
- 1223 Twenty-three units
- 1224 Twenty-four units
- 1225 Twenty-five units
- 1226 Twenty-six units
- 1227 Twenty-seven units
- 1228 Twenty-eight units
- 1229 Twenty-nine units
- 1230 Thirty units
- 1231 Thirty-one units
- 1232 Thirty-two units
- 1233 Thirty-three units
- 1234 Thirty-four units
- 1235 Thirty-five units
- 1236 Thirty-six units
- 1237 Thirty-seven units
- 1238 Thirty-eight units
- 1239 Thirty-nine units
- 1240 Forty units
- 1241 Forty-one units
- 1242 Forty-two units
- 1243 Forty-three units
- 1244 Forty-four units
- 1245 Forty-five units
- 1246 Forty-six units
- 1247 Forty-seven units
- 1248 Forty-eight units
- 1249 Forty-nine units
- 1250 Fifty units
- 1251 Fifty-one units
- 1252 Fifty-two units
- 1253 Fifty-three units
- 1254 Fifty-four units
- 1255 Fifty-five units
- 1256 Fifty-six units
- 1257 Fifty-seven units
- 1258 Fifty-eight units
- 1259 Fifty-nine units
- 1260 Sixty units
- 1261 Sixty-one units
- 1262 Sixty-two units
- 1263 Sixty-three units

- 1264 Sixty-four units
- 1265 Sixty-five units
- 1266 Sixty-six units
- 1267 Sixty-seven units
- 1268 Sixty-eight units
- 1269 Sixty-nine units
- 1270 Seventy units
- 1271 Seventy-one units
- 1272 Seventy-two units
- 1273 Seventy-three units
- 1274 Seventy-four units
- 1275 Seventy-five units
- 1276 Seventy-six units
- 1277 Seventy-seven units
- 1278 Seventy-eight units
- 1279 Seventy-nine units
- 1280 Eighty units
- 1281 Eighty-one units
- 1282 Eighty-two units
- 1283 Eighty-three units
- 1284 Eighty-four units
- 1285 Eighty-five units
- 1286 Eighty-six units
- 1287 Eighty-seven units
- 1288 Eighty-eight units
- 1289 Eighty-nine units
- 1290 Ninety units
- 1291 Ninety-one units
- 1292 Ninety-two units
- 1293 Ninety-three units
- 1294 Ninety-four units
- 1295 Ninety-five units
- 1296 Ninety-six units
- 1297 Ninety-seven units
- 1298 Ninety-eight units
- 1299 Ninety-nine units and more
- 1300 Other specialized residential structures
- 1155 Mobile Home Park
- 1156 RV Park
- 1310 Barracks
- 1320 Dormitories
- 1330 Hotels, motels, and tourist courts
- 1340 Single room occupancy units

- 1350 Temporary structures, tents, etc. for shelter
- 1360 Other structurally converted buildings
- 1370 Emergency Shelter
- 1380 Homeless Shelter
- 1400 Group Home (assisted living, retirement, long-term medical, 1/2 way house, or shelter)
- 2000 Commercial buildings and other specialized structures
- 2100 Office or bank building
- 2101 Office or bank building (zero lot line)
- 2110 Office building with drive-through facility
- 2200 Store or shop building
- 2201 Store or shop building (zero lot line)
- 2202 Store or shop building our door service / maintenance / work area
- 2210 Shop or store building with drive-through facility
- 2211 Drive-up store/building/hut: such as coffee/snack or other service (shaved ice, food)
- 2220 Restaurant building
- 2221 Restaurant w/ no drive thru (primarily sit down restaurant / café)
- 2222 Restaurant w/ drive thru (primarily fast food restaurant)
- 2223 Liquor store / (an establishment sells alcohol
- 2224 Alcohol serving establishment, which also served food (Tavern, Bar, Lounge)
- 2225 Alcohol serving establishment, which does not serve food
- 2230 Standalone store or shop building
- 2240 Department store building
- 2250 Warehouse discount store building
- 2260 Market shops including open markets
- 2270 Gasoline station
- 2280 Automobile repair and service structures
- 2300 Office or store building with residence on top
- 2400 Office building over storefronts
- 2500 Malls, shopping centers, or collection of shops
- 2510 Neighborhood center (convenience with one or more anchors)
- 2520 Community center (general merchandise with two or more anchors)
- 2530 Regional center (enclosed mall with two or more anchors)
- 2540 Superregional center (similar to regional, but has three or more anchors)
- 2550 Fashion/specialty center (higher end, fashion-oriented stores)
- 2560 Power center (category-dominated anchors with few small tenants)
- 2570 Theme or festival center (leisure, tourist-oriented, restaurants)
- 2580 Outlet or discount center (manufacturer outlet stores)
- 2590 Other kinds of shopping centers
- 2591 Convenience stores or centers
- 2592 Home improvement center
- 2593 Car care center
- 2594 Car wash (self, mechanical, or hand-wash)
- 2600 Industrial buildings and structures

- 2610 Light industrial structures and facilities
- 2611 Loft building
- 2612 Mill-type factory structures
- 2613 One-story modern manufacturing plants
- 2614 Industrial parks
- 2615 Laboratory or specialized industrial facility
- 2616 Nuclear Research Facility
- 2620 Heavy industrial structures and facilities
- 2621 Assembly and construction-type plants
- 2622 Process plants (metals, chemicals, etc.)
- 2630 Oil refinery facility
- 2631 Refinery with anchored equipment < 100,000 barrels/day
- 2632 Refinery with unanchored equipment < 100,000 barrels/day
- 2633 Refinery with anchored equipment > 100,000 barrels/day
- 2634 Refinery with unanchored equipment > 100,000 barrels/day
- 2635 Refinery pumping plant with anchored equipment
- 2636 Refinery pumping plant with unanchored equipment
- 2700 Warehouse or storage facility
- 2710 Mini-warehouse
- 2720 High-rise mini-warehouse
- 2730 Warehouse structure
- 2740 Produce warehouse
- 2750 Refrigerated warehouse or cold storage
- 2760 Large area distribution or transit warehouse
- 2761 Food Distribution Center
- 2770 Wharf and dock shed
- 2771 Conex Box / RR shipping container
- 2772 Semi-truck trailer (anchored)
- 2773 Semi-truck trailer (not - anchored)
- 2780 Tank farms
- 2781 Tank farms with anchored tanks
- 2782 Tank farms with unanchored tanks
- 2790 Maintenance Yard
- 2800 Food Industry Production / Processing facilities
- 2810 Consumer food processing
- 2811 Bakery, Baked goods
- 2812 Cannery
- 2813 Grain Mill
- 2814 Meat Processing / Packaging Facility
- 2820 Beverage Production and Bottling
- 2821 Water, soft drinks
- 2822 Brewery / Distillery / Winery
- 3000 Public assembly structures

3100 Theater  
 3110 Performance theater  
 3120 Movie theater  
 3130 Amphitheater  
 3140 Drive-in theaters  
 3200 Indoor/Outdoor games facility / Amusement Parks / Water Parks  
 3210 Amusement / Water Park  
 3220 Casino / Bingo  
 3230 Ski Resort / Winter Park  
 3250 Racetrack - animal  
 3260 Racetrack / Drag strip - Auto  
 3270 Golf Facility  
 3280 Fair / Exhibition Grounds  
 3290 Rodeo Grounds  
 3300 Sports stadium or arena  
 3310 Ice Arena  
 3400 Exhibition, convention, or conference structure  
 3500 Churches, synagogues, temples, mosques, etc.  
 3600 Capitol buildings  
 3601 US Capitol  
 3602 State Capitol  
 3610 County / Parish Courthouse  
 3620 City Hall  
 3630 Public Administration (Executive / Legislative)  
 3640 Judicial Administration  
 3641 US Supreme Court  
 3642 Federal Court  
 3643 State Supreme Court  
 3644 State Court  
 3645 Local Court / Courthouse  
 3650 Public Administration Federal  
 3660 Public Administration State  
 3670 Public Administration (Local)  
 3680 Tribal Administration  
 3690 Governmental Residences  
 3691 White House  
 3692 Federal Residence  
 3693 Governor's Residence  
 3694 Local Residence  
 3700 Covered or partially covered atriums and public enclosures  
 3800 Other community structures  
 3810 Mail or Shipping Facility  
 3811 Post Office

3811 Bulk Mail Center  
3811 Private and Express Shipping  
3820 Community / Recreation Center  
3900 Passenger assembly  
3910 Mixed mode terminal  
3920 Airport terminal  
3921 Air Passenger Hub  
3922 Air Shipping Hub  
3930 Bus terminal  
3940 Train station  
3950 Harbor or port terminal  
4000 Institutional or community facilities  
4001 Public Health Office  
4100 Medical facility  
4101 Nursing Home / Long Term Care  
4102 Hospice  
4110 Hospital building  
4120 Medical clinic building  
4121 Outpatient Clinic  
4122 Psychiatric Facility  
4123 Rehabilitation Center  
4124 Substance Abuse Facility  
4130 Medical Building (Doctors Office)  
4150 Dental Office  
4160 Medical Facilities  
4161 Diagnostic Laboratory  
4162 Medical Research Laboratory  
4163 Medical Stockpile Facility  
4164 Morgue  
4170 Other Facilities Medical in Nature  
4171 Blood Bank  
4172 Pharmacy  
4180 Day (Child) Care Facility  
4190 Veterinary Hospital, Clinic, Facility or buildings  
4200 School or university buildings  
4210 Grade school  
4211 Pre-School  
4212 Elementary School  
4213 Junior High / Middle School  
4214 High School  
4220 College or university facility  
4230 Trade or specialty school facility  
4300 Library building

- 4400 Museum, exhibition, or similar facility
- 4410 Exhibitions and art galleries
- 4420 Planetarium
- 4430 Aquarium
- 4440 Outdoor facility, no major structure
- 4441 Marina
- 4450 Zoological parks
- 4460 Arboretum / Botanical Garden
- 4470 Historic Site / Point of Interest / Landmark
- 4471 Lighthouse / Light
- 4472 Lookout Tower
- 4473 National Symbol / Monument
- 4474 National Park Facility
- 4475 Visitor Center / Information Center
- 4476 State Park / Monument / Symbol
- 4477 Private Park / Monument / Symbol
- 4480 Campground Facility
- 4490 Park
- 4491 Picnic Area
- 4500 Public safety-related facility
- 4510 Fire and rescue station
- 4511 Fire training facility/academy
- 4520 Police station / Law Enforcement
- 4521 Federal Law Enforcement
- 4522 State Law Enforcement
- 4523 Local Law Enforcement
- 4530 Emergency operation center
- 4531 Civil Defense
- 4532 Federal Emergency Management
- 4540 Emergency Medical Services
- 4550 Emergency Assistance or Red Cross related facility
- 4600 Jails, penitentiaries, detention centers, and other correctional facilities
- 4610 Law Enforcement and jail, Penitentiary Correctional Facility with Law Enforcement Admin
- 4700 Cemetery, monument, tombstone, or mausoleum
- 4800 Funeral homes and cremation facilities
- 5000 Transportation-related facilities
- 5002 Weigh Station / Inspection Station
- 5003 Toll Booth / Plaza
- 5004 Truck Stop (non-commercial)
- 5005 Snow shed
- 5100 Linear or network feature
- 5110 Pedestrian trail, sidewalks, etc.
- 5111 Trailhead

- 5120 Bicycle and other nonmotorized paths
- 5130 Highways and roads
- 5131 Principal arterial--interstate
- 5132 Principal arterial--freeway and expressway
- 5133 Other principal arterial
- 5134 Minor arterial
- 5135 Major collector
- 5136 Minor collector
- 5137 Local road
- 5138 Alley
- 5139 Other nonclassified road
- 5140 Highway bridges and tunnels
- 5141 Bridge: Road
- 5142 Tunnel: Road
- 5150 Railroads, including monorails, etc.
- 5151 Bridge: Railroad
- 5152 Tunnel: Railroad
- 5153 Bridge: Light Rail / Subway
- 5154 Tunnel: Light Rail / Subway
- 5160 Waterways
- 5200 Automobile parking facilities
- 5210 Surface parking, open
- 5211 Park and Ride / Commuter Parking, open
- 5220 Surface parking, covered
- 5221 Park and Ride / Commuter Parking, covered
- 5230 Multistoried parking structure with ramps
- 5240 Underground parking structure with ramps
- 5250 Rooftop parking facility
- 5300 Bus stop shelter
- 5400 Bus or truck maintenance facility
- 5500 Water transportation or marine related
- 5501 Boat Ramp / Dock
- 5502 Harbor / Marina
- 5510 Port fuel facility
- 5511 Port fuel facility with anchored tanks, with back-up power
- 5512 Port fuel facility with anchored tanks, without back-up power
- 5513 Port fuel facility with unanchored tanks, with back-up power
- 5514 Port fuel facility with unanchored tanks, without back-up power
- 5515 Port fuel facility with buried tanks
- 5520 Pier, dock, wharf, or jetty
- 5530 Lighthouse
- 5540 Riverboats and other anchored facilities
- 5550 Port storage or warehouse

5551 Stationary port handling equipment  
5552 Rail mounted port handling equipment  
5553 Port warehouses  
5560 Port Facility  
5561 Port Facility: Commercial Port  
5562 Port Facility: Crane  
5563 Port Facility: Maintenance and Fuel Facility  
5564 Port Facility: Modal Transfer Facility  
5565 Port Facility: Passenger Terminal  
5566 Port Facility: Warehouse Storage / Container Yard  
5600 Air and space transportation facility  
5601 Airport Terminal  
5610 Runway  
5620 Airport maintenance and hangar facility  
5630 Airport control tower  
5640 Heliport facility  
5650 Glideport, seaport, stolport, ultralight or balloonport facility  
5700 Railroad facility  
5701 Command / Control Facility  
5702 Freight Loading Facility  
5703 Roundhouse Turntable  
5704 Station  
5705 Light Rail Power Substation  
5706 Light Rail Station  
5707 Subway Station  
5710 Railroad switching facility  
5720 Railroad sheds and other support structures  
5790 Space Transportation Facilities  
5791 Launch Facility  
5792 Launch Pad  
6000 Utility and other nonbuilding structures  
6100 Utility structures on right-of-way  
6110 Electric lines, phone and cable lines, etc.  
6111 Distribution circuits with seismically designed components  
6112 Distribution circuits with standard components  
6120 Gas and fuel lines  
6130 Water supply lines  
6131 Brittle pipelines  
6132 Ductile pipelines  
6140 Steam and air conditioning lines  
6150 Irrigation channels  
6160 Sewer and waste water lines  
6161 Brittle pipelines

6162 Ductile pipelines  
6200 Water-supply-related facility  
6205 Fire hydrant  
6210 Water supply pump station  
6211 Pumping plant with anchored equipment < 10 MGD  
6212 Pumping plant with unanchored equipment < 10 MGD  
6213 Pumping plant with anchored equipment > 10 MGD  
6214 Pumping plant with unanchored equipment >10 MGD  
6220 Dam  
6221 Earth dam, arch  
6222 Earth dam, multi-arch  
6223 Buttress dam  
6224 Gravity dam, rock fill  
6225 Gravity dam, concrete  
6226 Gravity dam, masonry  
6227 Gravity dam, stone  
6228 Gravity dam, timber crib  
6230 Levee  
6240 Culvert  
6250 Water tank (elevated, at grade, underground)  
6251 On-ground anchored concrete tank  
6252 On-ground unanchored concrete tank  
6253 On-ground anchored steel tank  
6254 On-ground unanchored steel tank  
6255 Above ground steel tank  
6256 On-ground wood tank  
6257 Buried concrete tank  
6260 Water Intake / Wells  
6261 Well  
6262 Public Water Supply Intake  
6263 Public Water Supply Well  
6264 Private Water Supply Intake  
6265 Private Water Supply Well  
6270 Water treatment and purification (WTP) facility  
6271 WTP with anchored components < 50 MGD  
6272 WTP with unanchored components < 50 MGD  
6273 WTP with anchored components 50-200 MGD  
6274 WTP with unanchored components 50-200 MGD  
6275 WTP with anchored components > 200 MGD  
6276 WTP with unanchored components > 200 MGD  
6277 Pumping station  
6278 Water System Control facility  
6280 Water reservoir

- 6290 Other irrigation facilities
- 6300 Sewer and waste-related facility
- 6310 Storage or pumping station facility
- 6311 Lift stations with anchored components < 10 MGD
- 6312 Lift stations with unanchored components < 10 MGD
- 6313 Lift stations with anchored components > 10 MGD
- 6314 Lift stations with unanchored components > 10 MGD
- 6320 Landfill facility
- 6321 Waste transfer facility
- 6330 Incinerator, composting, or similar facility
- 6340 Hazardous waste storage facility
- 6341 High-level waste facility
- 6342 Transuranic waste facility
- 6343 Spent fuel facility
- 6344 Low-level waste facility
- 6345 Hazardous materials facility
- 6346 Superfund Site
- 6350 Sewer treatment plant
- 6351 Wastewater Treatment Plant (WWTP) with anchored components < 50 MGD
- 6352 WWTP with unanchored components < 50 MGD
- 6353 WWTP with anchored components 50-200 MGD
- 6354 WWTP with unanchored components 50-200 MGD
- 6355 WWTP with anchored components > 200 MGD
- 6356 WWTP with unanchored components > 200 MGD
- 6400 Gas or electric power generation facility
- 6410 Gas storage and distribution facility
- 6411 Natural Gas Facility
- 6412 Oil/Gas Facility
- 6413 Oil/Gas Well or Field
- 6414 Oil/ Gas Extraction or Injection Well
- 6415 Oil / Gas Pumping Station
- 6416 Oil / Gas Refinery
- 6417 Oil / Gas Processing Plant
- 6418 Oil / Gas Storage Facility / Tank Farm
- 6419 POL Storage Tank
- 6420 Gas compressor stations
- 6421 Gas compressor stations with anchored components
- 6422 Gas compressor stations with unanchored components
- 6430 Power generation plants
- 6431 Power plants with anchored components < 100 MW
- 6432 Power plants with unanchored components < 100 MW
- 6433 Power plants with anchored components > 100 MW
- 6434 Power plants with unanchored components >100 MW

- 6440 Electric substation and distribution facility
- 6441 Low-voltage (115 KV) substation with anchored components
- 6442 Low-voltage (115 KV) substation with unanchored components
- 6443 Medium-voltage (230 KV) substation with anchored components
- 6444 Medium-voltage (230 KV) substation with unanchored components
- 6445 High-voltage (500 KV) substation with anchored components
- 6446 High-voltage (500 KV) substation with unanchored components
- 6450 Geothermal facility
- 6460 Solar and other forms of energy facility
- 6461 Hydroelectric Facility
- 6462 Waste / Biomass Facility
