I. AUTHORITY

Authority: Idaho Code § 67-827 and Idaho Code §67-833

II. ABSTRACT

A baseline establishes a minimal requirement for security practices. The first six Center for Internet Security controls are defined as the basic controls needed for cyber security hygiene within an organization. These basic security controls were referenced to build this custom baseline for Agencies to achieve an acceptable level of information security.

III. DEFINITIONS

See ITS Guideline G105 (Glossary of Terms) for any definitions.

IV. STANDARD

Agencies will implement the CSC baseline document maintained by the ITS State Chief Information Security Officer (CISO). This document is considered sensitive in nature and may only be available by approved request.
V. EXEMPTION PROCESS

Refer to ITA Policy P1010 (IT Policies, Standards, and Guidelines Framework).

VI. PROCEDURE REFERENCE

- Center for Internet Security (CIS) Critical Security Controls (CSCs).

VII. CONTACT DATA

For more information and to request the CSC baseline document from the State CISO pertaining to this standard, contact the ITA Staff at (208) 605-4000.

REVISION HISTORY

Effective Date: 12/17/2019
